SUMMARY

MERN stack developer with hands-on experience building full-stack web applications Proficient in React, Node.js, MongoDB, and Express with practical experience in JWT authentication, REST APIs, Socket.io.

SKILLS

Backend	Node.js, Express.js, REST APIs, JWT Authentication, Zod Validation
Frontend	HTML5, CSS3, JavaScript, React, Redux Toolkit, Zustand, Tailwind, Shadcn UI
Database	MongoDB (NoSQL)
Tools & Services	Git, GitHub, Stripe Payments, Cloudinary, Socket.io

PROJECTS

Skillora (*React, Node.js, MongoDB, Express, Redux, Tailwind, Stripe*) [GitHub](#) | [Live](#)

- Built a full-stack **LMS** with **React 19**, **Node.js**, and **MongoDB** enabling instructors to publish video courses and students to enroll via **Stripe** payments and track course completion progress.
- Implemented **JWT**-based authentication with **role-based access control** for instructor and student dashboards, using **Redux Toolkit** for global state management across a multi-page React application.
- Integrated **Cloudinary** for cloud video storage and **Stripe** for payment processing, building a complete course commerce pipeline from upload to enrollment to progress tracking.

TaskZen (*React 19, Node.js, Express, MongoDB, Socket.io, Zustand, Tailwind CSS*) [GitHub](#) | [Live](#)

- Developed a full-stack multi-user task management platform using **React 19**, **Node.js**, **Express**, and **MongoDB** with three-tier **role-based access control** (Owner, Admin, Member) for workspace and project management.
- Built a real-time **Kanban board** with drag-and-drop using **dnd-kit** and live task-level chat powered by **Socket.io**, enabling teams to update task status, track deadlines, and collaborate in real time.
- Architected a **RESTful** backend with **Express 5** and **Mongoose** featuring nested permission logic across workspaces, projects, and tasks with deadline tracking and role-scoped data visibility for each member.

GatePe (*React 19, Node.js, Express, MongoDB, Stripe, Auth0, Tailwind CSS*) [GitHub](#)

- Developed a full-stack event ticketing platform using **React 19**, **Node.js**, and **MongoDB** where organizers can list shows, set ticket prices and dates, and users can purchase tickets via **Stripe** payment integration.
- Implemented **QR code** ticket generation post-payment using the **qrcode** library, enabling users to present digital tickets at venue gates for seamless entry verification by gate staff.
- Built a **GateMate** scanner interface using **html5-qrcode** for real-time ticket validation at entry points, with **Auth0** authentication and **Zod** schema validation securing the platform end-to-end.

EDUCATION

2022 – 2025 Bachelor of Computer Applications (BCA) at Narula Institute of Technology
2019 – 2021 Higher Secondary (10+2) at Kalyan Nagar Vidyapith, India
2018 – 2019 Secondary (10th) at Sodepur High School, India
